

I have been collecting family information for many years and have a lot of fragmented information everywhere. I now need to put it into some order and work on publishing something that the entire family can share.

I must tell you that getting information for the Ustaszewski family was a big challenge for me over the years. I tried several local genealogists and each told me that they could not find any information. After contacting you, however, that all changed!!

You immediately discovered the location of my ancestors and put together a plan to fully research the family in Lomza. You outlined a plan for me and then, after approval, launched the plan to several days of on site research. You provided a detailed history of my family history, took hundreds of photo's from the area, cemeteries and church records.

The work you have provided is incredibly detailed and very difficult to prepare. The records were in three different languages and required tremendous knowledge to sift through everything and make order of it. I simply could not have done this without you!

Because of your work I have so much more information about the Ustaszewski family. Thanks very much for all your hard work. You are a really professional and I would be happy to recommend your research services to any one of your future clients!

With Thanks and Appreciation!

John Ustas
